

AKHIL PARAMBALATH

UI/UX DESIGNER & FRONT-END DEVELOPER

9 years
EXPERIENCED

CAREER OBJECTIVES

I am a website designer based in UAE and India. I specialise in UI and UX designing. I create beautiful, usable, professional websites and Apps using best practice accessibility and the latest W3C web standards guidelines, resulting in semantic and seo friendly. All my websites are lovingly hand coded. For building websites my weapons of choice are Photoshop for creating layouts, then Brakets to produce clean semantic HTML5 and CSS3.

I'm constantly learning web technologies and other design related topics, currently playing around with Javascript and JQuery. I'm a skilled in many areas of design and development.

I love to travel, and I love my Work!
